Public Utility Easement (PUE)

Right of Way (ROW)

Sidewalk
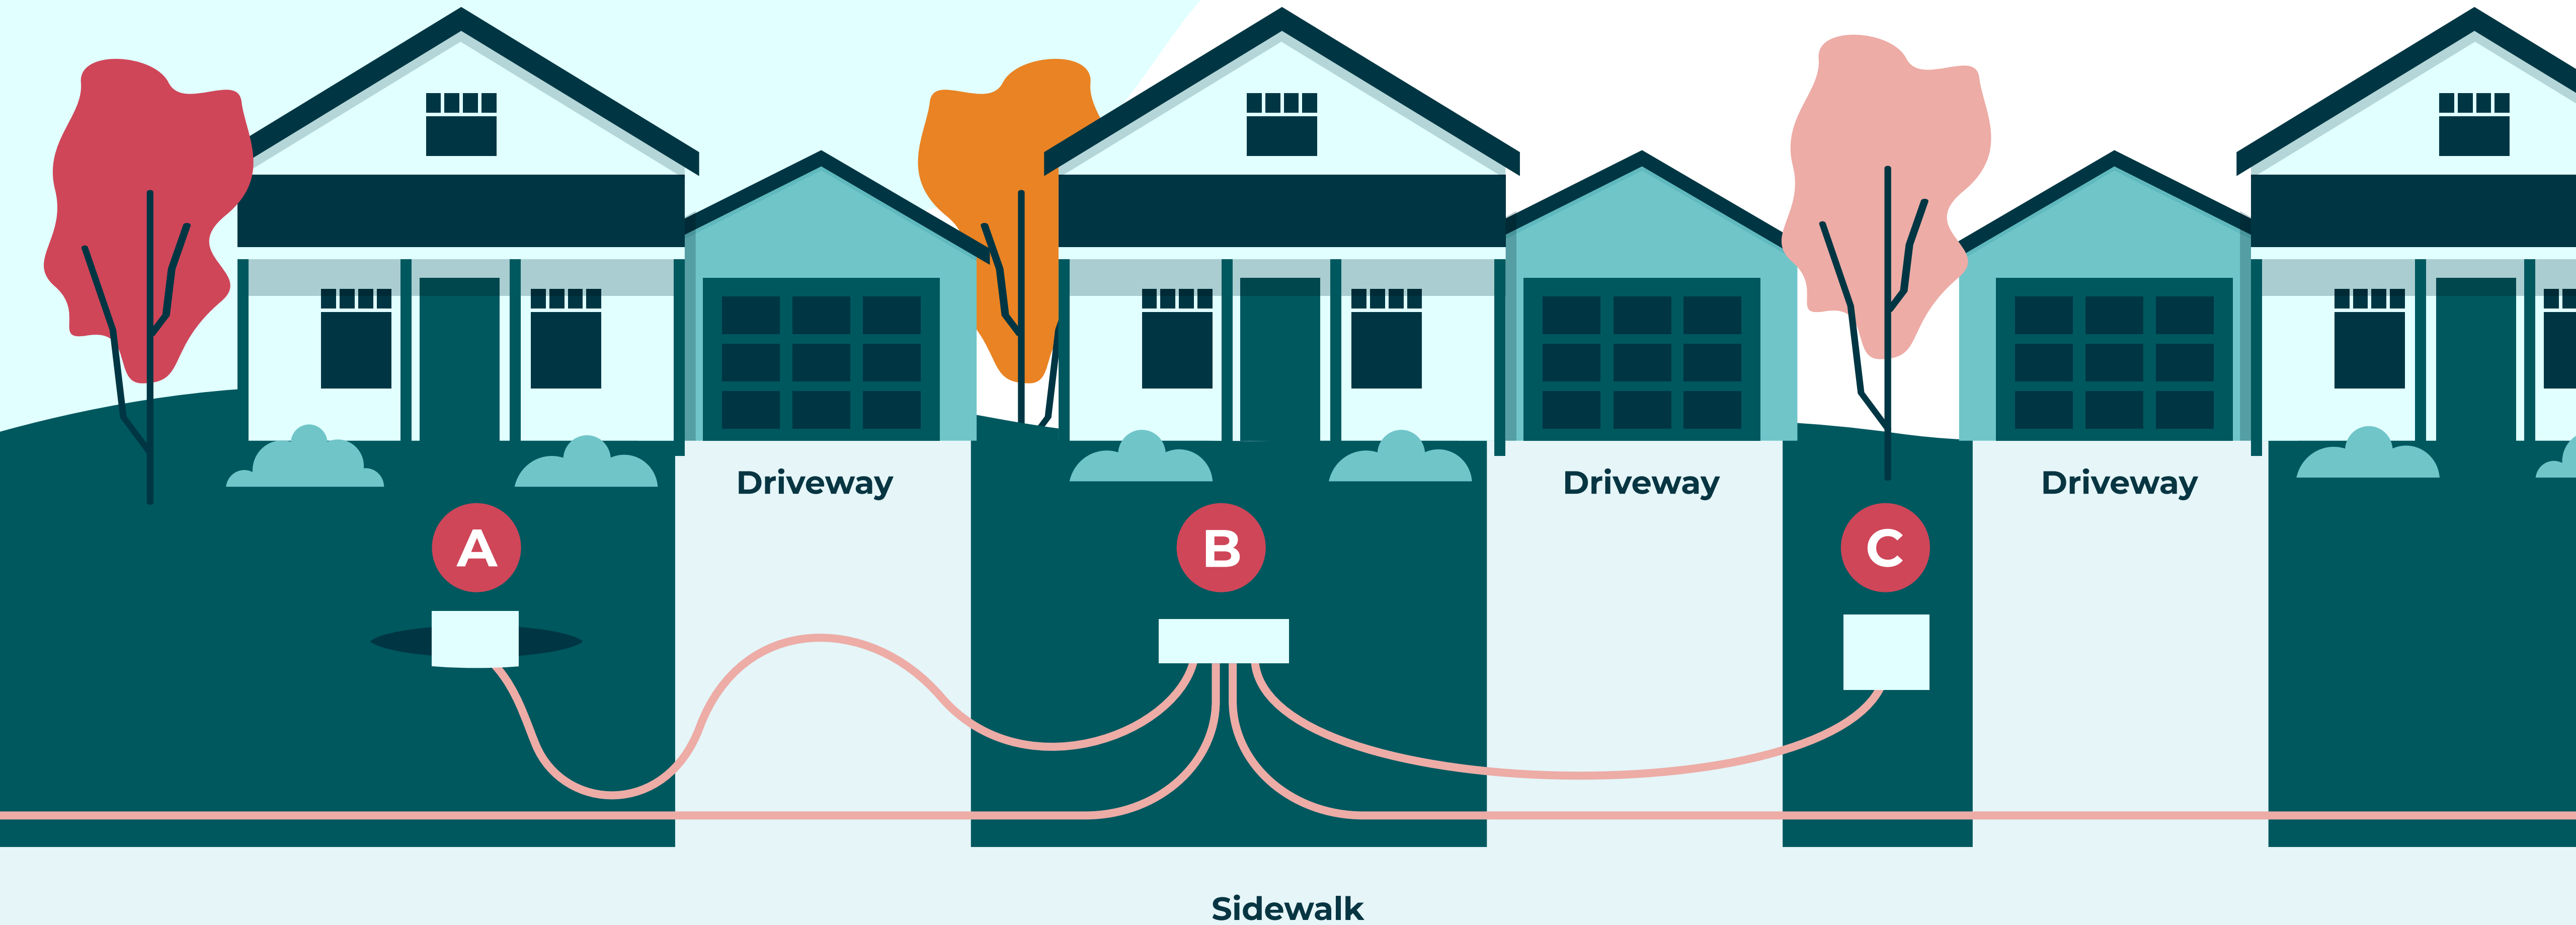

UTILITY VAULT AND CONDUIT LOCATIONS

A Conduits being installed in the PUE

B Some homes will have 17"x30" or 24"36" utility vaults in the PUE. The locations will vary but are generally between homes

C Generally every other home will have a 12" x12" service vault between homes. These will be placed in the PUE

DIRECTIONAL DRILLING

A Directional drilling equipment – used to install conduits without creating an open trench. Machine pierces the ground and bore's a hole underground where conduits will be placed.

B Where vaults are located a hole will need to be dug to intercept the conduits and place a vault.
